

CONNOR BABINGTON

SYSTEM DEVELOPER

> ABOUT ME

Mid-level system developer with eight years of experience in UK local government, with expertise in full-stack development, backend, frontend and server administration.

I analyse and plan user needs, program and test code with modern languages and frameworks, and design robust and scalable systems.

Collaborates closely with developers, designers, project managers and customers to deliver effective solutions. Strong experience with Azure DevOps (CI/CD) and GitHub for version control.

Thrives with both structured and open-ended tasks and works effectively independently and in a team.

Resident in Tønsberg with valid residence permit. Native English speaker, Norwegian level A2/B1, with active language development. Open to remote, hybrid or on-site developer roles.

> EXPERIENCE

+ *Warwickshire County Council, UK*

2015 - 2023

SYSTEM DEVELOPER

Developed and maintained multiple full-stack applications using C#, Python, Ruby on Rails, SQL, and JavaScript. Delivered reliable, well-tested software and resolved stability issues. Collaborated closely with stakeholders to translate technical requirements into effective solutions. Learned and applied multiple programming languages and frameworks to adapt to project changes. Main responsibilities:

- Designed, coded and implemented backend and frontend systems on several projects.
- Identified and fixed software bugs to ensure stability and performance.
- Produced clean, maintainable code with thorough testing and documentation.
- Collaborated with other developers to solve complex technical challenges.
- Supported colleagues and guided team members on best practices for code and processes.

+ *Royal Vapes, UK*
